

The Chiropractic Association of Louisiana

Presents

Growing Brains, Strong Foundations

April 18-19, 2026

About this Program:

Screen time, limited physical activity, and increasing mental demands place a growing burden on today's pediatric population. Chiropractors are uniquely positioned to support neurologic development during these critical years- not only for children, but for the families they serve.

This presentation takes a closer look at pediatric development, neurologic tone, and strategies to optimize nervous system function within the pediatric and family population. Attendees will learn practical, clinically applicable strategies grounded in functional neurology that can be easily implemented in practice to enhance patient outcomes.

This class discusses the pediatric population and the axial and appendicular considerations and assessment opportunities. It will discuss Sexual dimorphism and why it matters; the female and male brain difference. It will also discuss practical applications for every chiropractic practice, including re-defining "tummy time" and applied neuroscience to augment the chiropractic adjustment. Risk management and ethical considerations will also be covered where appropriate when treating the pediatric population.

About Michael Hall

Michael Hall, BS.,D.C.,CCST, DABCN, FIACN is a chiropractic neurologist and has been providing chiropractic care for over three decades. He is a well-known and highly sought out educator and consultant on chiropractic functional neurology, sport performance, concussion care, and complex disorder management. In addition to clinical practice, Dr. Hall lectures both nationally and internationally on chiropractic neurology, advanced clinical techniques, and complex case management. He is the founder of Brain DC which presents educational seminars around the world. Dr. Hall has post-graduate faculty status at Life University, Texas Chiropractic College, the International Chiropractic Pediatric Association and is a visiting professor at the Barcelona College of Chiropractic in Spain. He is a published researcher with interests in brain function, oxygen saturation, spinal cord disorders, frozen shoulder and health related outcomes with OTZ technique. A 1990 magna cum laude graduate of Parker, Dr. Hall currently serves as a Clinical Advisory Panelist for the Australian Spinal Research Foundation, is a lifetime Alumni member of Parker University, member of the ICPA and International Association on Chiropractic Neurology. He is a former full professor within the Department of Clinical Sciences at Parker University where he received multiple awards and honors as a distinguished faculty and mentor.
